DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: 1-14.

With respect to claim 1, Synder (U.S. Patent 6,035,221 is the closest prior art to the application invention which discloses a speaker phone module is disclosed. The module includes a housing defining a cradle for removably receiving a cellular telephone battery charger. The housing further encloses speaker phone circuitry for interconnecting a cellular telephone within the battery charger to a microphone and speaker within the housing. A connector within the cradle provides means for electrically connecting the speaker phone circuitry to the battery charger (See e.g. Title, Abstract & Figs. 1-4B). However, the prior art of record fails to disclose or render obvious that the housing, the outer structure comprising as upper housing, the upper housing having a generally hemispherical shape, a circular dimple aperture disposed on the upper housing; a loudspeaker disposed within the housing; a main terminal for coupling electrical signals to the loudspeaker; and a link mechanically coupling the main terminal to the housing; wherein when the loudspeaker is actuated, the upper housing and circular dimple aperture facilitate acoustic waves that propagate radially from the module.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
